

USB DIGITAL SOUND RECORDER

1. GENERAL INSTRUCTIONS :

- 1.1 USB Digital Sound Recorder has dual functions as a voice recorder and a flash disk.
- 1.2 DO NOT plug the device into your computer when recording.
- 1.3 Charge the device by plugging it to the computer for 3-4 hours prior to use.
- 1.4 Switch the button to "OFF" position all the time, unless recording.
- 1.5 This is a plug and play device compatible with most operating systems.

2. TO RECORD :

2.1 Switch the button to "ON". A small red light will flash a few times and when the red light is off, the recording process will begin.

2.2 Switch button to "OFF" when recording is finished and the recorded voice is automatically saved.

2.3 To Access your recorded file, plug the device into the computer's USB port and open the drive. Then open the folder "RECORD", the recorded file will be found in .WAV format. Users can delete, copy or play the recorded files found in the folder.

2.4 Please DO NOT delete the system files found within the device, otherwise the recording device will not function properly.

2.5 When the battery is finished or the memory is full, the device will automatically save the recorded file.
